Subject: Call from Doctor in Dimock

OK jut after we met I got a call from a Dr. in Dimock - no idea how he got my number!

He say the issue isn't just methane, there are a host of VOC's including BTEX, , arsenic and barium concentrations in the wells , which a methane removal system would not remove..

We had a very lengthy discussion. He is not a home owner but has patients that are complaining of skin burning etc. on using the water for showering and some say the treatment units are not working...

Ex. 5 - Deliberative

Karen D. Johnson, Chief

Ground Water & Enforcement Branch
